## REALTOR® Association Models General Aggregate Assessment Results .

This page provides an aggregate of the results compiled from all participants within an association that completed the Models questionnaire. The results provide a percentage of how each question was answered by all who completed the questionnaire. For example, the results may indicate that 25% of the respondents selected the administration response option for a particular question in the Governance section; 70% selected the management option; and 5% selected the Leadership option. From these results, you may conclude that most of your associations "stakeholders" believe that the association operates in a management mode for that area of Governance.
