Summary

The REALTORS® Confidence Index (RCI) survey gathers on-the-ground information from REALTORS® based on their real estate transactions in the month. This report presents key results about March 2021 market transactions.

Several metrics indicate a continued strong buyer market as supply levels remain low. The REALTORS® Buyer Traffic Index increased from 77 in February 2021 to 79 (very strong conditions) in March 2021 while the REALTORS® Seller Traffic Index remains below 50 which is “weak” traffic compared to the level one year ago. Every home sold had more than four offers. On average, REALTORS® expect home prices in the next three months to increase nearly 5% from one year ago and sales in the next three months to increase 2% from last year’s sales level.

With little supply in the market, homes typically sold within 18 days (29 days one year ago), a new record low from the prior record that was just achieved in February 2021.

The share of first-time buyers increased to 32% (31% in the prior month, 34% one year ago).

The pandemic continues to impact how people live and work. A higher share of buyers, at 87%, purchased a property in a suburban, small town, rural, or resort area (80% one year ago). Sixty-one percent of REALTORS® reported they had potential buyers looking for work-from-home features such as an extra room, a finished basement, or a bigger home.

1 An index greater than 50 means more respondents reported conditions as “strong” compared to one year ago than “weak.” An index of 50 indicates a balance of respondents who viewed conditions as “strong” or “weak.”

REALTOR® CONCERNS
About the *RCI Survey*

• The *RCI Survey* gathers information from REALTORS® about local market conditions based on their client interactions and the characteristics of their most recent sales for the month.

• The March 2021 survey was sent to 50,000 REALTORS® who were selected from NAR’s more than 1.4 million members through simple random sampling and to 6,686 respondents in the previous three surveys who provided their email addresses.

• There were 4,043 respondents to the online survey which ran from April 1-8, 2021, of which 1,947 had a client. Among those who had a client, the survey’s maximum margin of error for proportion estimates is two percent at the 95 percent confidence level. The margins of error for subgroups are larger.

• NAR weights the responses by a factor that aligns the sample distribution of responses to the distribution of NAR membership.

The *REALTORS® Confidence Index* is provided by NAR solely for use as a reference. Resale of any part of this data is prohibited without NAR’s prior written consent. For questions on this report or to purchase the RCI series, please email: Data@realtors.org

The National Association of REALTORS®, “The Voice for Real Estate,” is America’s largest trade association, representing 1.4 million members, including NAR’s institutes, societies and councils, involved in all aspects of the real estate industry. NAR membership includes brokers, salespeople, property managers, appraisers, counselors and others engaged in both residential and commercial real estate.

The term REALTOR® is a registered collective membership mark that identifies a real estate professional who is a member of the National Association of REALTORS® and subscribes to its strict Code of Ethics.

Working for America’s property owners, the National Association provides a facility for professional development, research and exchange of information among its members and to the public and government for the purpose of preserving the free enterprise system and the right to own real property.

NATIONAL ASSOCIATION OF REALTORS®

RESEARCH GROUP

The Mission of the National Association of REALTORS® Research Group is to collect and disseminate timely, accurate and comprehensive real estate data and to conduct economic analysis in order to inform and engage members, consumers, and policymakers and the media in a professional and accessible manner.
