

November 2021: Uptick in Buyer Demand But First-time Buyer Share Declines

The REALTORS® Confidence Index (RCI) survey gathers on-the-ground information from REALTORS® based on their real estate transactions in the month. This report presents key results about November 2021 market transactions.

REALTORS® reported an uptick in buying activity in November, a month when sales tend to seasonally decline somewhat. The *REALTORS® Buyer Traffic Index* increased to 60 in November (56 in the prior month, 71 one year ago). The uptick in buying activity could be due to buyers seeking to lock in their mortgage at the current low rates before rates rise further in 2022 as the Federal Reserve Board eases and even tightens money supply to control inflation. However, housing supply remains low, with the *REALTORS® Seller Traffic Index* decreasing to 40 (43 in the prior month; 41 one year ago). An index below 50 means 'weaker' conditions during the month compared to one year ago.

Demand continues to outpace supply. On average, respondents reported taking four clients (4.1 clients in the prior month, 4 clients one year ago). On average, respondents listed just nearly two properties during the month (1.6), about half of the average number of clients taken on a home tour.

Properties typically stayed on the market for shorter days compared to one year ago at 18 days (18 days in the prior month, 21 days one year ago), with 83% of properties that closed in October sold in less than one month (82% in the prior month, 73% one year ago). On average, there were nearly four offers (3.8) on a home sold in November (3.7 in the prior month; 3.3 one year ago). Based on transactions reported by REALTORS®, a higher fraction of buyers purchased property in a suburban, small town, rural area, resort area, at 88% (87% in the prior month, 85% one year ago).

However, interested first-time homebuyers are struggling to move into homeownership. Based on transactions reported by REALTORS®, the share of first-time buyers fell to 26% in November (29% in the prior month, 32% one year ago). The share of FHA loans to mortgage financing also fell to 11% (14% in the prior month, 15% one year ago). Meanwhile, the share of cash sales stayed at 24% (24% in the prior month, 20% one year ago).

While buyer demand picked up, fewer buyers are unwilling to put in a higher offer: the fraction of respondents who made an offer above the list price declined to 40% compared to 55% in June 2021. Buyers also appear less willing to waive their appraisal and inspection contingencies: the fraction of buyers who also waived the appraisal contingency decreased to 21% (23% in the prior month) and the share of buyers who waived the inspection contingency decreased to 19% (21% in the prior month).

Among contracts in the past three months, 24% had a delayed settlement (24% in the prior month, 30% one year ago). Of contracts that had a delayed settlement, 23% were delayed due to appraisal issues (21% in the prior month, 21% one year ago).

^{/1} An index greater than 50 means a higher fraction of respondents reported "stronger" than "weaker" conditions compared to one year ago.

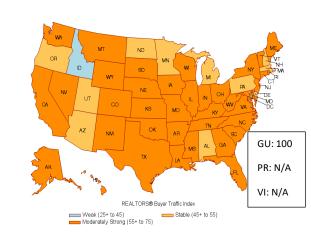

^{/2} Non-primary residence use refers to vacation use or residential rental.

About the RCI Survey

- The RCI Survey gathers information from REALTORS® about local market conditions based on their client interactions and the characteristics of their most recent sales for the month.
- The November 2021 survey was sent to 50,000 REALTORS® who were selected from NAR's more than 1.5 million members through simple random sampling and to 4,184 respondents in the previous three surveys who provided their email addresses.
- There were 2,454 respondents to the online survey which ran from December 1-7, 2021, of which 1,348 had a client. Among those who had a client, the survey's maximum margin of error for proportion estimates is two percent at the 95 percent confidence level. The margins of error for subgroups are larger.
- NAR weights the responses by a factor that aligns the sample distribution of responses to the distribution of NAR membership.

The REALTORS® Confidence Index is provided by NAR solely for use as a reference. Resale of any part of this data is prohibited without NAR's prior written consent. For questions on this report or to purchase the RCI series, please email: Data@realtors.org
