The Mortgage Market

Mortgage rates kicked off 2021 with a new record low. Nevertheless, rates were trending upward for the rest of the first quarter as COVID-19 vaccine became available to more Americans and millions of people received stimulus payments. According to the mortgage finance provider Freddie Mac, the 30-year fixed mortgage rate was 2.88 percent in Q1 2021 compared to 3.51 percent a year earlier. Thus, homebuyers have excellent purchasing power at these historically low mortgage rates. What to expect about mortgage rates in the upcoming quarters? Rates are more likely to rise than fall as inflation will pick up in the following months. NAR is forecasting the 30-year mortgage rate to average 3.1% for the second quarter of 2021.
