## The Mortgage Market

Mortgage rates surged in the first quarter of the year. The war in Ukraine added to upward pressure on inflation. As a result, the Federal Reserve raised its short-term interest rates by 25 basis points in March in its efforts to control elevated inflation. Although the Fed doesn't set up mortgage rates, Fed's actions have a ripple effect. A higher rate for banks tends to make borrowing more expensive for consumers affecting eventually long-term interest rates (such as 10-year Treasury bond). While mortgage rates typically follow the trend of the 10-year Treasury yield, the rate on the conventional 30-year mortgage also tends to rise. Nevertheless, the Fed will continue its tightening policy with additional rate hikes in the following months. Thus, the outlook is for mortgage rates to rise even further. According to the mortgage finance provider Freddie Mac, the 30-year fixed mortgage rate rose to 3.8 percent in Q1 2022 from 2.9 percent a year earlier. NAR forecasts the 30-year fixed mortgage rate to hover around 5.5 percent in mid-2022.
