| Income needed to afford a mortgage | \$136,549 | \$109,154 |
|------------------------------------|-----------|-----------|
| Median renter family income (2022) | \$54,718 | \$52,328 |
| Income gap for renters | -\$81,831 | -\$56,826 |
| Home affordability index* | 249.6 | 208.6 |

A mortgage is affordable if a family spends at most 25% of income on the mortgage payment so that total costs (including utilities, taxes, insurance, and maintenance) are no more than 30% of income.

Calculations assume a 10% downpayment at 6.8% 30-year fixed rate and 0.8% points.

An affordability index of 100 means homes are typically affordable; a higher index means homes are typically unaffordable.

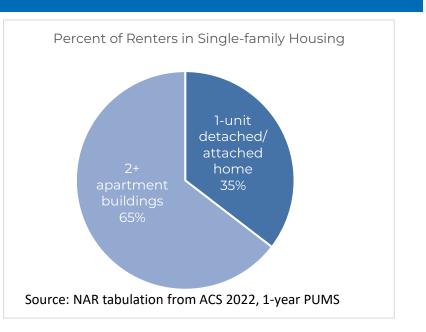

HAI= (income needed to afford a mortgage/median family income)x 100

Notes:

1 Gross domestic product or gross state product is the sum of value added across all industries. Value added is the industry's gross output (sales or receipts and other operating income, commodity taxes and inventory change) minus its intermediate inputs (consumption of goods and services purchased from other industries. Summing only value added to arrive at GDP does away with double-counting the output across various industries.

The real estate, rental, and leasing industry includes establishments engaged in managing real estate for others, selling, renting, buying real estate for others,

and appraising real estate.

Gross state product, gross domestic product, and total employment data are from the Bureau of Economic Analysisis. BEA employment data includes self-employed workers.
